

Utility Flood, UFB-Gen2

LED Flood / Area Lighting

Project:	
Catalog#:	
Approved by:	

Description

The UFB2 is an LED energy-saving, cost-effective solution to replace 250, 400 and 1,000 watt HID (HPS & MH) flood lights.

Construction

- Heavy duty die-cast aluminum housing
- Durable powder coat finish
- Corrosion resistant (stainless steel) hardware
- Thumb-screw entry
- Three (3) station terminal block that accepts 14 to 6 AWG
- Pre-wired with a 7.5ft, 14/3 SJTW cord with 6 in. outer jacket removed and conductors stripped to ½ in.
- Wrap-around yoke or slip-fitter
- IP66 rated
- Self-cleaning heat sink

Electrical

- Driver power factor is > 0.9
- Driver THD < 20%
- Driver voltage 120-277V (50/60Hz), or 347-480V (50/60Hz)
- 0-10V dimming with 7-pin photo control receptacle
- Electronic driver(s) has an expected life of 100,000 hours at 25°C ambient.
- NEMA 7-pin twist lock photo control receptacle
- 20kV/10kA surge protection (meets or exceeds ANSI/IEEE62.41)
- Suitable for ambient temperatures from -40°C to +40°C
- Reported L90 >36,000 hours per IESNA TM-21

Features

The driver compartment is secured with thumbscrews for easy access to the driver, surge suppressor, and terminal block. The optical compartment is IP66 rated to prevent the ingress of water. An optional glare-shield is available. This flood offers factory set options for input power at nominal 10W increments, that gives the installer a wide range of output settings to meet the required wattage, lumen output, and lumens per watt. This allows for customization of the product to meet jobsite needs.

Optical

- IP66 rated optics enclosure
- Glass lens
- Standard 4000K CCT
- Min 70 CRI
- Type 7x7 NEMA distribution
- Optional field-installed glare shield (Order UF-GS)

Certification Ratings

- UL listed, suitable for wet locations
- IP66 fixture and optical enclosure (per ANSI C136.37)
- LM79/LM80 testing
- RoHS compliant

Options

- Slip-fitter with external wiring
- Long-Life photocontrol
- Shorting cap
- Glare shield

Dimensions

Weight: 28lbs

EPA 90° from nadir: 2.8

EPA 0° from nadir: 1.4

Adjustable Output Unit (optional, add suffix "A" to a model)

AOU is used to lower the fixture's light output and wattage. It can be easily adjusted with a flat-blade screwdriver. **In all UFB2 fixtures using "Yoke" mount with the option of the "AOU", the AOU is accessible via the 3/4" KO plug on the bottom of the fixture for quick access.** The unit consumes no standby power and can be removed to convert the luminaire to standard 0-10V dimming. This allows maintenance departments to carry less inventory through reduced number of unique models. The unit can be utilized to achieve lumen efficacy as high as 160LPW.

Base Model	AOU Position	Nominal Luminaire Wattage (W)	HID Replacements (HPS: High Pressure Sodium, MV: Mercury Vapor, MH: Metal Halide)	Lumen Output (±5% typical value)			
				3000K CCT		4000K CCT	
				Standard	w/ shield	Standard	w/ shield
